FOR IMMEDIATE RELEASE – May 18, 2010

AVflex 8000 Plate Processor is Designed for High-Quality, Low-Volume Operations

Bryan, OH – The AVFlex 8000, a new plate processor designed for lower volume prepress departments with the highest-quality standards, offers everything needed to process solvent-wash plates up to 12” x 18” in size. Ideal for tag and label applications, this multi-function system includes a two-brush rotary washout unit with SmartPanel processor, exposure section, dryer and plate finisher.

A new spiral, two-brush rotary washout provides efficient processing of photopolymer plates. Washout operations are controlled by a SmartPanel processor. Features include automatic drum positioning with forward and reverse job for easy removal of plates. The Exposure/Oven/Finisher is equipped with independent digital timers, a three-drawer purge oven with exhaust and an independent drawer for light finishing.

For almost 50 years A&V has helped the flexo industry achieve sustained growth by providing its customers with the finest printing materials and equipment available

worldwide. For further information, contact your Anderson & Vreeland representative, call toll-free at 866.282.7697 or visit www.AndersonVreeland.com.
