

**ANDERSON &
VREELAND** INC.

ULTRAFLEX™ is a new alternative replacement chemistry for processing sheet photopolymers used in the flexographic process.

WHAT IS ULTRAFLEX?

- *Strong Solvency Characteristics
for Processing Plates*
- *Use to Washout Most Plate Materials*
- *Balanced for Strength and Integrity*
- *Gives You the High Solvency You
Need with Thicker Plates*
- *Dries a Plate in a Relatively Short
Period of Time*
- *High Flash Point of 146° F*
- *Competitively Priced*

ULTRAFLEX™ is available only through
Anderson Vreeland.
